Jiulian Resources Inc.

Notes to the Condensed Interim Financial Statements (Unaudited)

Expressed in Canadian Dollars

For the three months ended May 31, 2011

1. Corporate Information

Jiulian Resources Inc. (the "Company") was incorporated on October 17, 2006 under the laws of British Columbia. The Company was a capital pool Company as defined in the TSX Venture Exchange (the "Exchange") Policy 2.4. On July 28, 2009, the Exchange accepted for filing the Company's Qualifying Transaction, as a result, the Company resumed trading as a Tier 2 mining company under the symbol "JLR", on August 26, 2009. The Company is now pursuing opportunities in the acquisition, exploration and development of mineral resource properties.

The Company is in the process of exploring its mineral properties and has not yet determined whether the properties contain reserves that are economically recoverable. The recoverability of the amounts shown for mineral property and related deferred exploration costs are dependent upon the existence of economically recoverable reserves, the ability of the Company to obtain necessary financing to complete the development of the reserve, the achievement of profitable production, or alternatively upon the Company's ability to dispose of its interests on an advantageous basis. Changes in future conditions could require material write-downs of the carrying values. In addition, although the Company has taken steps to verify title to the properties on which it is conducting exploration and in which it has an interest, in accordance with industry standards for the current stage of exploration of such property, these procedures do not guarantee the Company's title. Property title may be subject to unregistered prior agreements and non-compliance with regulatory requirements.

The Company's exploration activities are subject to various federal, provincial laws and regulations governing the protection of the environment. These laws and regulations are continually changing and generally becoming more restrictive. The Company conducts its operations so as to protect public health and the environment and believes its operations are materially in compliance with all applicable laws and regulations. The Company has made, and expects to make in the future, expenditures to comply with such laws and regulations.

2. Basis of Preparation

a) Statement of Compliance

The financial statements of the Company for the year-ending February 28, 2011 will be prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB"), having previously prepared its financial statements in accordance with pre-changeover Canadian Generally Accepted Accounting Principles ("pre-changeover Canadian GAAP"). These condensed interim financial statements for the three month period ended May 31, 2011 have been prepared in accordance with IAS 34 Interim Financial Reporting, and as they are part of the Company's first IFRS annual reporting period, IFRS 1 First-time Adoption of International Financial Reporting Standards has been applied.

Jiulian Resources Inc.

Notes to the Condensed Interim Financial Statements (Unaudited)

Expressed in Canadian Dollars

For the three months ended May 31, 2011

As these condensed interim financial statements are the Company's first financial statements prepared using IFRS, certain disclosures that are required to be included in annual financial statements prepared in accordance with IFRS that were not included in the Company's most recent annual financial statements prepared in accordance with pre-changeover Canadian GAAP have been included in these financial statements for the comparative annual period. However, these condensed interim financial statements do not include all of the information required for full annual financial statements.

These condensed interim financial statements should be read in conjunction with the Company's 2010 annual financial statements and the explanation of how the transition to IFRS has affected the reported financial position, financial performance and cash flows of the Company is provided in Note 20.

The condensed interim financial statements were authorized for issue by the Board of Directors on August 28, 2011.

b) Going Concern

These unaudited interim financial statements have been prepared on the basis of accounting principles applicable to a going concern, which assumes that the Company will continue in operation for the foreseeable future and will be able to realize its assets and discharge its liabilities in the normal course of operations as they come due. In assessing whether the going concern assumption is appropriate, management takes into account all available information about the future, which is at least, but is not limited to, twelve months from the end of the reporting period. Management is aware, in making its assessment, of material uncertainties related to events or conditions that cast significant doubt upon the entity's ability to continue as a going concern.

The company has not cash generated from operations. The Company incurred a net loss of \$38,936 during the three months-ended May 31, 2011 and, as of that date the Company's deficit was \$817,188. However, the company has sufficient cash resources to meet its obligations for at least twelve months from the end of the reporting period. As the company is in the exploration stage, the recoverability of the costs incurred to date on exploration properties is dependent upon the existence of economically recoverable reserves, the ability of the Company to obtain the necessary financing to complete the exploration and the development of its properties and upon future profitable production or proceeds from the disposition of the properties and deferred exploration expenditures. There is, however, no assurance that any such initiatives will be sufficient and, as a result, there is significant doubt regarding the going concern assumption and, accordingly, the ultimate appropriateness of the use of accounting principles applicable to a going concern. These financial statements do not reflect the adjustments to the carrying values of assets and liabilities and the reported expenses and balance sheet classifications that would be necessary if the Company were unable to realize its assets and settle its liabilities as a

Jiulian Resources Inc.

Notes to the Condensed Interim Financial Statements (Unaudited)

Expressed in Canadian Dollars

For the three months ended May 31, 2011

going concern in the normal course of operations for the foreseeable future. These adjustments could be material.

3. Summary of Significant Accounting Policies

The accounting policies set out below are expected to be adopted for the year-ending February 28, 2011 and have been applied consistently to all periods presented in these condensed interim financial statements and in preparing the opening IFRS balance sheet at March 1, 2010 for the purposes of the transition to IFRS, unless otherwise indicated.

a) Cash and Cash Equivalents

Cash and cash equivalents includes cash on hand, deposits held at call with financial institutions and other short-term, highly liquid investments with original maturities of three months or less that are readily convertible to known amounts of cash and subject to an insignificant risk of change in value. For cash flow statement presentation purposes, cash and cash equivalents includes bank overdrafts.

b) Mineral Exploration and Evaluation Expenditures

Pre-exploration Costs

Pre-exploration costs are expensed in the period in which they are incurred.

Exploration and Evaluation Expenditures (E&E)¹

Once the legal right to explore a property has been acquired, costs directly related to E&E expenditures are recognized and capitalized, in addition to the acquisition costs. These direct expenditures include such costs as materials used, surveying costs, drilling costs, payments made to contractors and depreciation on plant and equipment during the exploration phase. Costs not directly attributable to exploration and evaluation activities, including general administrative overhead costs, are expensed in the period in which they occur.

¹ Capitalizing vs. Expensing Exploration and Evaluation Costs:

Under IFRS 6, upon transition to IFRS, an entity may continue to follow their current accounting policies, whereby E&E expenditures are capitalized or a Company may elect to expense all E&E costs. Current industry practice on the capitalization vs. expensing of E&E activities varies by company. Significant management judgement is required to determine appropriate accounting principles relating to the treatment of E&E expenditures upon transition to IFRS. Jiulian Resources Inc. has elected to continue to capitalize E&E activities that are directly related to the discovery, acquisition or development of E&E activities upon transition to IFRS.

Julian Resources Inc.

Notes to the Condensed Interim Financial Statements (Unaudited)

Expressed in Canadian Dollars

For the three months ended May 31, 2011

The Company may occasionally enter into farm-out arrangements, whereby the Company will transfer part of a mineral interest, as consideration, for an agreement by the transferee to meet certain E&E expenditures which would have otherwise been undertaken by the Company. The Company does not record any expenditures made by the farmee on its behalf. Any cash consideration received from the agreement is credited against the costs previously capitalized to the mineral interest given up by the Company, with any excess cash accounted for as a gain on disposal.

When a project is deemed to no longer have commercially viable prospects to the Company, E&E expenditures in respect of that project are deemed to be impaired. As a result, those E&E expenditure costs, in excess of estimated recoveries, are written off to the statement of comprehensive loss/income.

The Company assesses E&E assets for impairment when facts and circumstances suggest that the carrying amount of an asset may exceed its recoverable amount.

Once the technical feasibility and commercial viability of extracting the mineral resource has been determined, the property is considered to be a mine under development and is classified as 'mines under construction'. E&E assets are also tested for impairment before the assets are transferred to development properties.

As the Company currently has no operational income, any incidental revenues earned in connection with exploration activities are applied as a reduction to capitalized exploration costs.

Mineral E&E expenditures are classified as intangible assets.

c) Reclamation Deposits

Cash which is subject to contractual restrictions on use is classified separately as reclamation deposits. Reclamation deposits are classified as loans and receivables.

d) Property, Plant and Equipment

Recognition and Measurement

On initial recognition, property, plant and equipment are valued at cost, being the purchase price and directly attributable cost of acquisition or construction required to bring the asset to the location and condition necessary to be capable of operating in the manner intended by the Company, including appropriate borrowing costs and the estimated present value of any future unavoidable costs dismantling and removing items. The corresponding liability is recognized within provisions.

Jiulian Resources Inc.

Notes to the Condensed Interim Financial Statements (Unaudited)

Expressed in Canadian Dollars

For the three months ended May 31, 2011

Property, plant and equipment is subsequently measured at cost less accumulated depreciation, less any accumulated impairment losses, with the exception of land which is not depreciated.

When parts of an item or property, plant and equipment have different useful lives, they are accounted for as separate items (major components) of property, plant and equipment.

Subsequent Costs

The cost of replacing part of an item of property, plant and equipment is recognized in the carrying amount of the item if it is probable that the future economic benefits embodied within the part will flow to the Company and its cost can be measured reliably. The carrying amount of the replaced part is derecognized. The costs of the day-to-day servicing of property, plant and equipment are recognized in profit or loss as incurred.

Major Maintenance and Repairs

Subsequent costs are included in the asset's carrying amount or recognized as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably. All other repairs and maintenance are charged to the profit or loss during the financial period in which they are incurred.

Gains and Losses

Gains and losses on disposal of an item of property, plant and equipment are determined by comparing the proceeds from disposal with the carrying amount, and are recognized net within other income in profit or loss.

Depreciation

Depreciation is recognized in profit or loss and is provided on a straight-line basis over the estimated useful life of the assets as follows:

Vehicles	30% using the declining balance method
Computer Equipment	45% using the declining balance method

Depreciation methods, useful lives and residual values are reviewed at each financial year-end and adjusted if appropriate.

Julian Resources Inc.

Notes to the Condensed Interim Financial Statements (Unaudited)

Expressed in Canadian Dollars

For the three months ended May 31, 2011

e) Impairment of Non-Financial Assets

Impairment tests on intangible assets with indefinite useful economic lives are undertaken annually at the financial year-end. Other non-financial assets, including E&E assets are subject to impairment tests whenever events or changes in circumstances indicate that their carrying amount may not be recoverable. Where the carrying value of an asset exceeds its recoverable amount, which is the higher of value in use and fair value less costs to sell, the asset is written down accordingly.

Where it is not possible to estimate the recoverable amount of an individual asset, the impairment test is carried out on the asset's cash-generating unit, which is the lowest group of assets in which the asset belongs for which there are separately identifiable cash inflows that are largely independent of the cash inflows from other assets. The Company has one cash-generating unit for which impairment testing is performed.

An impairment loss is charged to the profit or loss, except to the extent they reverse gains previously recognized in other comprehensive loss/income.

f) Financial Instruments

Financial Assets

Financial assets are classified as into one of the following categories based on the purpose for which the asset was acquired. All transactions related to financial instruments are recorded on a trade date basis. The Company's accounting policy for each category is as follows:

Loans and Receivables

These assets are non-derivative financial assets resulting from the delivery of cash or other assets by a lender to a borrower in return for a promise to repay on a specified date or dates, or on demand. They are initially recognized at fair value plus transaction costs that are directly attributable to their acquisition or issue and subsequently carried at amortized cost, using the effective interest rate method, less any impairment losses. Amortized cost is calculated taking into account any discount or premium on acquisition and includes fees that are an integral part of the effective interest rate and transaction costs. Gains and losses are recognized in the profit or loss when the loans and receivables are derecognized or impaired, as well as through the amortization process.

Impairment on Financial Assets

At each reporting date the Company assesses whether there is any objective evidence that a financial asset or a group of financial assets is impaired. A financial asset or group of financial assets is deemed to be impaired if, and only if, there is objective evidence of impairment as a result of one or more events

Julian Resources Inc.

Notes to the Condensed Interim Financial Statements (Unaudited)

Expressed in Canadian Dollars

For the three months ended May 31, 2011

that has occurred after the initial recognition of the asset and that event has an impact on the estimated future cash flows of the financial asset or the group of financial assets.

Financial Liabilities

Financial liabilities are classified as other financial liabilities, based on the purpose for which the liability was incurred, and comprise of trade payables and accrued liabilities. These liabilities are initially recognized at fair value net of any transaction costs directly attributable to the issuance of the instrument and subsequently carried at amortized cost using the effective interest rate method. This ensures that any interest expense over the period to repayment is at a constant rate on the balance of the liability carried in the statement of financial position. Interest expense in this context includes initial transaction costs and premiums payable on redemption, as well as any interest or coupon payable while the liability is outstanding.

g) Provisions

Rehabilitation Provision

The Company is subject to various government laws and regulations relating to environmental disturbances caused by exploration and evaluation activities. The Company records the present value of the estimated costs of legal and constructive obligations required to restore the exploration sites in the period in which the obligation is incurred. The nature of the rehabilitation activities includes restoration, reclamation and re-vegetation of the affected exploration sites.

The rehabilitation provision generally arises when the environment disturbance is subject to government laws and regulations. When the liability is recognized, the present value of the estimated costs is capitalized by increasing the carrying amount of the related mining assets. Over time, the discounted liability is increased for the changes in present value based on current market discount rates and liability specific risks.

Additional environment disturbances or changes in rehabilitation costs will be recognized as additions to the corresponding assets and rehabilitation liability in the period in which they occur.

Other Provisions

Provisions are recognized for liabilities of uncertain timing or amount that have arisen as a result of past transactions, including legal or constructive obligations. The provision is measured at the best estimate of the expenditure required to settle the obligation at the reporting date.

Jiulian Resources Inc.

Notes to the Condensed Interim Financial Statements (Unaudited)

Expressed in Canadian Dollars

For the three months ended May 31, 2011

h) Income Taxes

Income tax expense comprises of current and deferred tax. Current tax and deferred tax are recognized in net income except to the extent that it relates to a business combination or items recognized directly in equity or in other comprehensive loss/income.

Current income taxes are recognized for the estimated income taxes payable or receivable on taxable income or loss for the current year and any adjustment to income taxes payable in respect of previous years. Current income taxes are determined using tax rates and tax laws that have been enacted or substantively enacted by the year-end date.

Deferred tax assets and liabilities are recognized where the carrying amount of an asset or liability differs from its tax base, except for taxable temporary differences arising on the initial recognition of an asset or liability in a transaction which is not a business combination and at the time of the transaction affects neither accounting nor taxable profit or loss.

Recognition of deferred tax assets for unused tax losses, tax credits and deductible temporary differences is restricted to those instances where it is probable that future taxable profit will be available against which the deferred tax asset can be utilized. At the end of each reporting period the Company reassesses unrecognized deferred tax assets. The Company recognizes a previously unrecognized deferred tax asset to the extent that it has become probable that future taxable profit will allow the deferred tax asset to be recovered.

i) Share Capital

Financial instruments issued by the Company are classified as equity only to the extent that they do not meet the definition of a financial liability or financial asset. The Company's common shares, preferred shares, share warrants and flow-through shares are classified as equity instruments.

Incremental costs directly attributable to the issue of new shares or options are shown in equity as a deduction, net of tax, from the proceeds.

Earnings/Loss Per Share

Basic earnings/loss per share is computed by dividing the net income or loss applicable to common shares of the Company by the weighted average number of common shares outstanding for the relevant period.

Jiulian Resources Inc.

Notes to the Condensed Interim Financial Statements (Unaudited)

Expressed in Canadian Dollars

For the three months ended May 31, 2011

Diluted earnings/loss per common share is computed by dividing the net income or loss applicable to common shares by the sum of the weighted average number of common shares issued and outstanding and all additional common shares that would have been outstanding, if potentially dilutive instruments were converted.

j) Share-based Payments

Where equity-settled share options are awarded to employees, the fair value of the options at the date of grant is charged to the statement of comprehensive loss/income over the vesting period.

Performance vesting conditions are taken into account by adjusting the number of equity instruments expected to best at each reporting date so that, ultimately, the cumulative amount recognized over the besting period is based on the number of options that eventually vest. Non-vesting conditions and market vesting conditions are satisfied, a charge is made irrespective of whether these vesting conditions are satisfied. The cumulative expense is not adjusted for failure to achieve a market vesting condition or where a non-vesting condition is not satisfied.

Where the terms and conditions of options are modified before they vest, the increase in the fair value of the options, measured immediately before and after the modification, is also charged to the statement of comprehensive loss/income over the remaining vesting period.

Where equity instruments are granted to employees, they are recorded at the fair value of the equity instrument granted at the grant date. The grant date fair value is recognized in comprehensive loss/income over the besting period, described as the period during which all the besting conditions are to be satisfied.

Where equity instruments are granted to non-employees, they are recorded at fair value of the goods or services received in the statement of comprehensive loss/income, unless they are related to the issuance of shares. Amounts related to the issuance of shares are recorded as a reduction of share capital.

When the value of goods or services received in exchange for the share-based payment cannot be reliably estimated, the fair value is measured by use of a valuation model. The expected life used in the model is adjusted, based on management's best estimate, for the effects of non-transferability, exercise restrictions, and behavioural considerations.

All equity-settled share-based payments are reflected in contributed surplus, until exercised. Upon exercise, shares are issued from treasury and the amount reflected in contributed surplus is credited to share capital, adjusted for any consideration paid.

Jiulian Resources Inc.

Notes to the Condensed Interim Financial Statements (Unaudited)

Expressed in Canadian Dollars

For the three months ended May 31, 2011

Where a grant of options is cancelled or settled during the vesting period, excluding forfeitures when vesting conditions are not satisfied, the Company immediately accounts for the cancellation as an acceleration of vesting and recognizes the amount that otherwise would have been recognized for services received over the remainder of the vesting period. Any payment made to the employee on the cancellation is accounted for as the repurchase of an equity interest except to the extent the payment exceeds fair value of the equity instrument granted, measured at the repurchase date. Any such excess is recognized as an expense.

4. Critical Accounting Estimates and Judgements

The preparation of the Company's financial statements in conformity with IFRS requires management to make judgements, estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Estimates and assumptions are continually evaluated and are based on management's experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. Actual results could differ from these estimates.

The effect of a change in an accounting estimate is recognized prospectively by including it in comprehensive income in the period of the change, if the change affects that period only, or in the period of the change and future periods, if the change affects both.

Information about critical judgements in applying accounting policies that have the most significant risk of causing material judgement to the carrying amounts of assets and liabilities recognized in the condensed interim financial statements within the next financial year are discussed below:

i) **Rehabilitation Provisions**

Rehabilitation provisions have been created based on Jiulian Resources Inc.'s internal estimates. Assumptions, based on the current economic environment, have been made which management believes are a reasonable basis upon which to estimate the future liability. These estimates take into account any material changes to the assumptions that occur when reviewed regularly by management. Estimates are reviewed annually and are based on current regulatory requirements. Significant changes in estimates of contamination, restoration standards and techniques will result in changes to provisions from period to period. Actual rehabilitation costs will ultimately depend on future market prices for the rehabilitation costs which will reflect the market conditions at the time of the rehabilitation costs are actually incurred. The final cost of the currently recognized rehabilitation provisions may be higher or lower than currently provided for.

Julian Resources Inc.

Notes to the Condensed Interim Financial Statements (Unaudited)

Expressed in Canadian Dollars

For the three months ended May 31, 2011

ii) Exploration and Evaluation Expenditure

The application of the Company's accounting policy for E&E expenditure requires judgement in determining whether it is likely that future economic benefits will flow to the Company, which may be based on assumptions about future events or circumstances. Estimates and assumptions made may change if new information becomes available. If, after expenditure is capitalized, information becomes available suggesting that the recovery of expenditure is unlikely, the amount capitalized is written off in the profit or loss in the period the new information becomes available.

iii) Title to Mineral Property Interests

Although the Company has taken steps to verify title to mineral properties in which it has an interest, these procedures do not guarantee the Company's title. Such properties may be subject to prior agreements or transfers and title may be affected by undetected defects.

iv) Income Taxes

Significant judgement is required in determining the provision for income taxes. There are many transactions and calculations undertaken during the ordinary course of business for which the ultimate tax determination is uncertain. The Company recognizes liabilities and contingencies for anticipated tax audit issues based on the Company's current understanding of the tax law. For matters where it is probable that an adjustment will be made, the Company records its best estimate of the tax liability including the related interest and penalties in the current tax provision. Management believes they have adequately provided for the probable outcome of these matters; however, the final outcome may result in a materially different outcome than the amount included in the tax liabilities.

In addition, the Company recognizes deferred tax assets relating to tax losses carried forward to the extent there are sufficient taxable temporary differences (deferred tax liability) relating to the same taxation authority and the same taxable entity against which the unused tax losses can be utilized. However, utilization of the tax losses also depends on the ability of the taxable entity to satisfy certain tests at the time the losses are recouped.

v) Share-based Payment Transactions

The Company measures the cost of equity-settled transactions with employees by reference to the fair value of the equity instruments at the date at which they are granted. Estimating fair value for share-based payment transaction requires determining the most appropriate valuation model, which is dependent on the terms and conditions of the grant. This estimate also requires determining the most appropriate inputs to the valuation model including the expected life of the share option, volatility and

Julian Resources Inc.

Notes to the Condensed Interim Financial Statements (Unaudited)

Expressed in Canadian Dollars

For the three months ended May 31, 2011

dividend yield and making assumptions about them. The assumptions and models used for estimating fair value for share-based payment transactions are disclosed in Note 13.

5. Cash and Cash Equivalents

Cash at banks and on hand earns interest at floating rates based on daily bank deposit rates.

6. Reclamation Deposits

The Company is required to make reclamation deposits in respect of its expected rehabilitation obligations. The reclamation deposits represent collateral for possible reclamation activities necessary on mineral properties in connection with the permits required for exploration activities by the Company.

7. Term Deposit

The term investments (redeemable) are Guaranteed Investment Certificates at a chartered Canadian Bank and interest is accrued at interest rates between 1.3% and 1.615% per annum, maturing between June 7, 2011 and March 18, 2013 (2010-0.90% per annum, matured Nov 20, 2010).

11. Share Capital and Reserves

a) Common Shares

The Company is authorized to issue an unlimited number of shares, issuable in series.

The holders of common shares are entitled to receive dividends which are declared from time to time, and are entitled to one vote per share at meetings of the Company. All shares are ranked equally with regards to the Company's residual assets.

The following is a summary of changes in common share capital from March 1, 2010 to May 31, 2011:

	Number of Shares	Issue Price	Amount
Balance at March 1, 2010	9,620,000		\$ 1,984,950
Shares Issued Via Private Placement	0		0
Flow-through Share Issuance	0		0
Issue of Shares on Exercise of Warrants	0		0
Issue of Shares on Exercise of Options	0		0
Issue of Shares as Payment	100,000	\$0.11	11,000
Less Share Issue Costs			0
Balance at February 28, 2011	9,720,000		\$ 1,995,950
Issue of Shares on Exercise of Warrants	0		0
Issue of Shares on Exercise of Options	0		0
Less Share Issue Costs			0
Balance at May 31, 2011	9,720,000		\$ 1,995,950

b) Contributed Surplus

The following is a summary of changed in contributed surplus from March 1, 2010 to May 31, 2011:

	31-May-11	28-Feb-11	01-Mar-10
Beginning of Year	\$ 72559	\$ 35500	\$ 45500
Stock Based Compensation	0	37059	0
Allocation to Share Capital	0	0	-10000
End of Year	<u>\$ 72,559</u>	<u>\$ 72,559</u>	<u>\$ 35,500</u>

Julian Resources Inc.

c) Nature and Purpose of Equity and Reserves

The reserves recorded in equity on the Company's balance sheet include 'Contributed Surplus', 'Accumulated Other Comprehensive Loss/Income' and 'Accumulated Deficit'.

'Contributed Surplus' is used to recognize the value of stock option grants and share warrants prior to exercise.

'Accumulated Other Comprehensive Loss/Income' includes an available-for-sale reserve. This reserve is used to recognize fair value changes on available-for-sale investments.

'Accumulated Deficit' is used to record the Company's change in deficit from earnings from period to period.

12. Share-Based Payments

a) Option Plan Details

The Company has an incentive Stock Option Plan ("the Plan") under which non-transferable options to purchase common shares of the Company may be granted to directors, officers, employees or service providers of the Company. The terms of the Plan provide that the Directors have the right to grant options to acquire common shares of the Company at not less than the closing market price of the shares on the day preceding the grant at terms of up to three years. No amounts paid or payable by the recipient on receipt of the option, and the options granted are not dependent on any performance-based criteria.

The following is a summary of changes in options from March 1, 2010 to May 31, 2011:

Grant Date	Expiry Date	Exercise Price	Opening Balance	During the Year			Closing Balance	Vested and Exercisable	Unvested
				Granted	Exercised	Forfeited			
21/04/10	21/04/13	\$0.15	390000	530000	0	0	920000	0	0
Weighted Average Exercise Price			0.14						

b) Fair Value of Options Issued During the Period

The weighted average fair value at grant date of options granted during the period ended May 31, 2011 was \$0.05 per option (year-ended February 28, 2011: \$0.05)

Julian Resources Inc.

Notes to the Condensed Interim Financial Statements (Unaudited)

Expressed in Canadian Dollars

For the three months ended May 31, 2011

Options Issued to Employees

The fair value at grant date is determined using a Black-Scholes option pricing model that takes into account the exercise price, the term of the option, the impact of dilution, the share price at grant date and expected price volatility of the underlying share, the expected dividend yield and the risk free interest rate for the term of the option.

Options Issued to Non-Employees

Options issued to non-employees, are measured based on the fair value of the goods or services received, at the date of receiving those goods or services. If the fair value of the goods or services received cannot be estimated reliably, the options are measured by determining the fair value of the options granted, using a valuation model.

The model inputs for options granted during the period ending May 31, 2011 included:

Grant Date	Expiry Date	Share Price at Grant Date	Exercise Price	Risk-Free Interest Rate	Expected Life	Volatility Factor	Dividend Yield
21/04/10	21/04/13	\$0.12	\$0.15	2.20%	3	100%	0

The expected price volatility is based on the historic volatility (based on the remaining life of the options), adjusted for any expected changes to future volatility due to publicly available information.

The weighted average share price at the date of exercise of options during the period ended May 31, 2011 was \$0.05 per share (year-ended February 28, 2011: \$0.05)

c) Expenses Arising from Share-Based Payment Transactions

Total expenses arising from share-based payment transactions recognized during the period as part of employee benefit expense were \$0.00 (3 months ended May 31, 2010: \$0.00).

13. Related Party Transactions

The following is a summary of the Company's related party transactions during the period:

a) Legal Fees

Legal fees of \$4095 (three months-ended May 31, 2010: \$1172), incurred in connection with the Company's financings as well as general corporate matters, were paid to a law firm of which one partner

Julian Resources Inc.

is a director of the Company.

b) Rental payments

Rental payments of \$1089 (three months-ended May 31, 2010:\$4170) were paid to Office Company, which is controlled by a director of the Company.

c) Key Management Compensation

Key management personnel compensation comprised:

	31-May-11	31-May-10
Short term employee benefits and director fees	\$ 0	\$ 0
Share-based Payments	0	0
	<u>\$ 0</u>	<u>\$ 0</u>

14. Segmental Reporting

The Company is organized into business units based on mineral properties and has one reportable operating segment, being that of acquisition and exploration and evaluation activities.

15. Events After the Reporting Date

JIULIAN AND GUNPOINT CLOSE BIG KIDD PROPERTY PURCHASE

Julian Resources Inc. ("Julian") (TSXV: JLR) and Gunpoint Exploration Ltd. ("Gunpoint") (TSXV: GUN) are pleased to announce that Julian's acquisition of the Big Kidd property and Little Fort property from Gunpoint closed as of July 12, 2011.

About the Property Acquisition

Pursuant to an amended and restated purchase and sale agreement dated March 30, 2011, (the "Agreement") Julian acquired 100% interest in Gunpoint's Big Kidd and Little Fort claims groups (the "Acquisition"). The purchase price for these two groups of claims was paid on closing and consisted of a cash payment to Gunpoint of \$100,000 and the issuance 1,875,000 common shares of Julian to Gunpoint. The common shares are subject to restrictions on trading pursuant to securities laws and policy. Julian's title to the Big Kidd and Little Fort claims is subject to a 2.5% net smelter return royalty in favour of Gunpoint and applicable Crown royalties. On July 8, 2011, Julian filed on SEDAR a technical report on the Big Kidd property pursuant to the policies of the TSX Venture Exchange. Gunpoint and

Jiulian are at arm's length to each other. Following the closing of the Acquisition, Dr. E. Max Baker will join the board of directors of Jiulian. No finder's fee was paid in connection with the Acquisition.

16. First Time Adoption of International Financial Reporting Standards

The Company's financial statements for the year-ending February 29, 2012 are the first annual financial statements that will be prepared in accordance with IFRS. IFRS 1, First Time Adoption of International Financial Reporting Standards, requires that comparative financial information be provided. As a result, the first date at which the Company has applied IFRS was March 1, 2010 (the "Transition Date"). IFRS 1 requires first-time adopters to retrospectively apply all effective IFRS standards as of the reporting date, which for the Company will be February 29, 2012. However, it also provides for certain optional exemptions and certain mandatory exceptions for first time IFRS adoption. Prior to transition to IFRS, the Company prepared its financial statements in accordance with pre-changeover Canadian Generally Accepted Accounting Principles ("pre-changeover Canadian GAAP").

In preparing the Company's opening IFRS financial statements, the Company has adjusted amounts reported previously in the financial statements prepared in accord with pre-changeover Canadian GAAP.

There are no immediate differences between the Company's Canadian GAAP financial statements and the new IFRS standards with the exception of the balance sheet where exploration assets were split between tangible and intangible and provisions were split from accounts payable and accrued liabilities. There were no differences between the statements of loss and comprehensive income and statements of cash flows.
