

JIULIAN RESOURCES INC.

Julian Receives Drilling Permit for the Hawk Copper-Gold Project, BC with Drilling Commencing in Late April

April 22, 2010 -- Vancouver, British Columbia – Julian Resources Inc. (“Julian” or the “Company”) (TSXV: JLR) is pleased to announce that Julian has received a drilling permit for its planned 2010 drill program on the Hawk Property located in south-central British Columbia, Canada.

The Phase I drilling plan comprises 1,000 metres of core drilling (2 or 3 holes) to test for the possible concealed manto/skarn/porphyry copper-gold system located on the eastern part of the property, which has been delineated by soil, lithogeochemical and three dimensional Induced Polarization (3D IP) surveys.

The drilling permit also allows the Company to conduct additional 2,000 metres of core drilling (4 or 5 holes) in its Phase II drilling program to test the extension of the possible copper-gold system when it is warranted by the result of the Phase I drilling.

Julian is well funded, with approximately \$1.5 million currently in its treasury. The exploration on the Hawk Property focuses on a possible large tonnage potential of disseminated copper and gold mineralization system on the central and eastern part of the property identified by the geological, geophysical and geochemical work.

The drilling program is supervised by X. Charlie Cheng, Ph. D., CEO of Julian. The technical information in this news release has been reviewed and approved by J. Paul Sorbara, M.Sc., P.Geo., a Qualified Person as defined by National Instrument 43 101 and a director of Julian.

The Company also wishes to announce the grant of 530,000 incentive stock options to various directors, officers, employees and consultants of the Company. The options have a three year term at an exercise price of \$0.15 per share and will be subject to a four month hold period.

About Julian Resources Inc.

Julian is a TSXV Tier 2 issuer (TSXV JLR) with offices in Vancouver, British Columbia. The Company’s Board of Directors includes experienced and dedicated professional geologists, businessmen and accounting personnel. The Company is currently exploring its Hawk project, located in the prolific Cariboo region of British Columbia, for large tonnage porphyry style copper and gold mineralization.
